**Client Device**

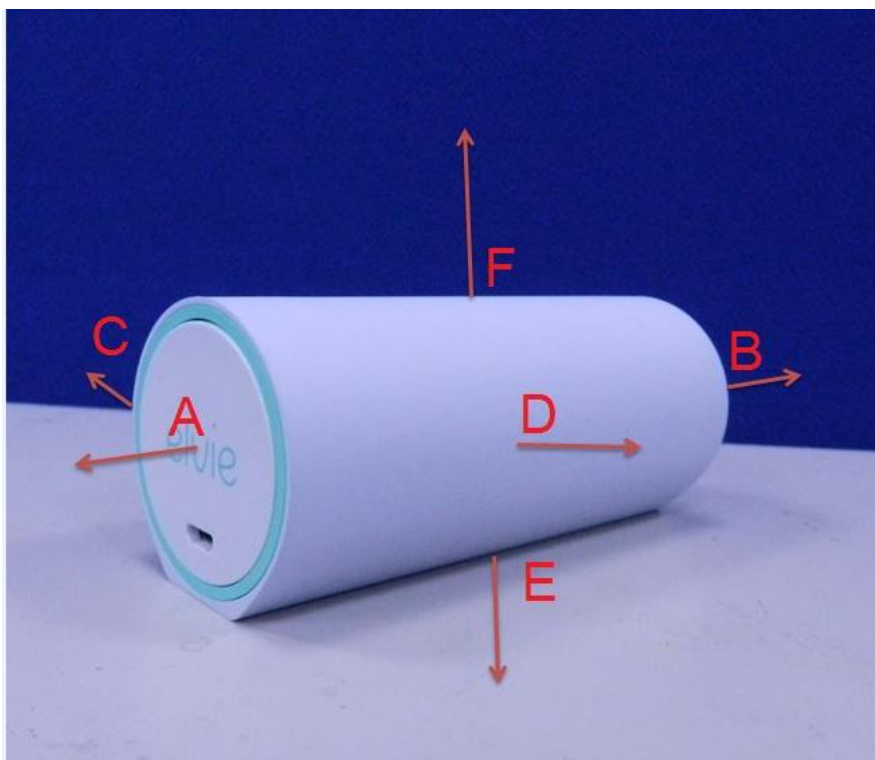

**WPC and Client Device**

**The Client Device is placed inside the WPC during the test.**

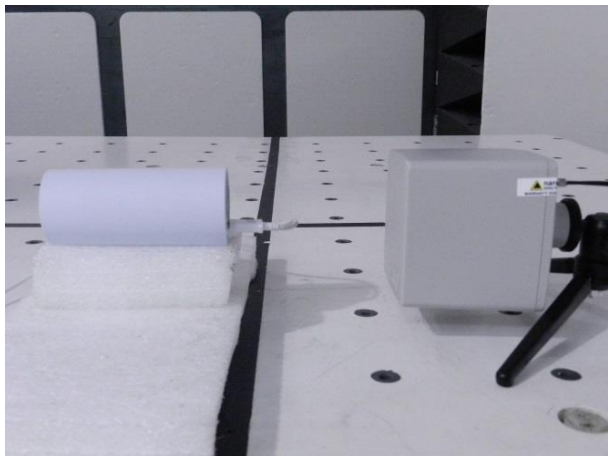

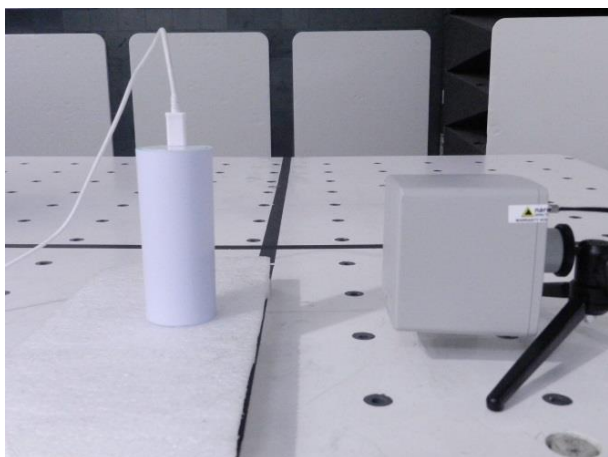

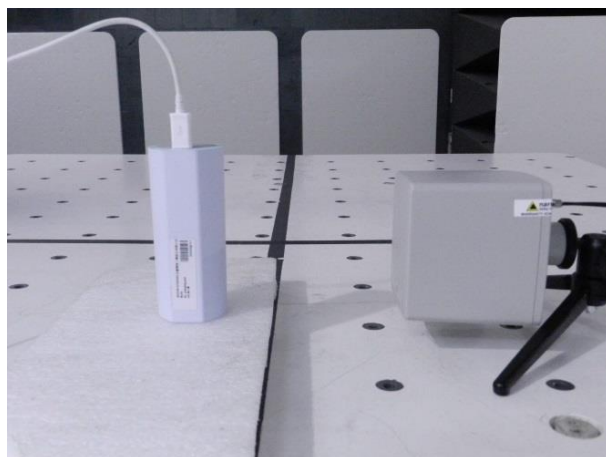

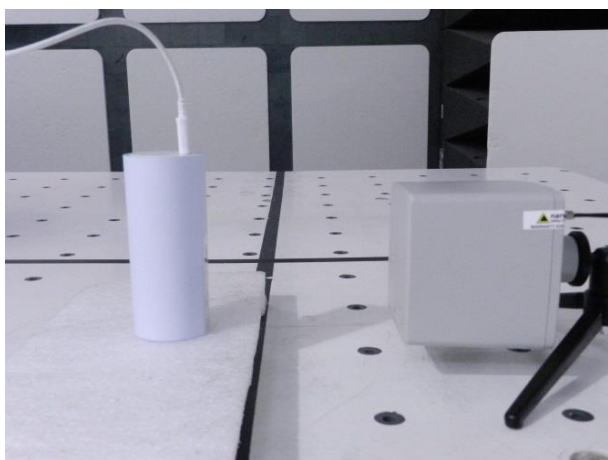

**Antenna Location**

**Definition of Test Position**

**<E&H-field Test Setup Photos>**

The equipment under test was placed on a wooden desk inside of shield room. The isotropic field probe was used to measure the field strength for 6 EUT surfaces, and during measurement a separation of 10cm is maintained between EUT surface and the center of the field probe.
